

Program D: Investment Management

Unless otherwise indicated, all objectives are to be accomplished during or by the end of FY 2003-2004. Objectives may be key or supporting level. The level of the objective appears after the objective number and before the objective text.

Performance indicators are made up of two parts: name and value. The indicator name describes what is being measured. The indicator value is the numeric value or level achieved within a given measurement period. For budgeting purposes, performance indicators are shown for the prior fiscal year, the current fiscal year, and alternative funding scenarios (continuation budget level and Executive Budget recommendation level) for the ensuing fiscal year of the budget document. Performance indicators may be key, supporting, or general performance information level. Key level is indicated by a "K" in the "Level" column of the standard performance indicator table. Supporting level is indicated by an "S" in the "Level" column of the standard performance indicator table. General Performance Information indicators appear in tables labeled as General Performance Information.

Proposed performance standards do not reflect the most recent budget adjustments implemented by the Division of Administration during development of the FY 2003-2004 Executive Budget Supporting Document. Rather, proposed performance standards indicate a "To be established" status since the agency had insufficient time to assess the full performance impacts of the final Executive Budget recommendation. As a result, during the 2003 Legislative Session, the agency will seek amendments to the General Appropriations Bill to identify proposed performance standards reflective of the funding level recommended in the Executive Budget Supporting Document.
